KISHAN KUMAR OJHA

Noida, IN | +91 8739047520| work.kishanojha@gmail.com |LinkedIn | Portfolio | Codolio | Github

MCA candidate specializing in Generative AI with hands-on experience in Python, SQL, Power BI, statistical analysis, and ETL workflows. Analyzed 7,000+ telecom records to develop validated datasets, interactive KPI dashboards, and actionable business insights.

PROJECTS

X-ray Calibration & Threshold Optimization | *Python, PyTorch, DenseNet121, SciPy, Grad-CAM* *(GitHub)*

- Built a reproducible medical imaging research pipeline using a frozen DenseNet121 multi-label classifier on NIH ChestX-ray14, evaluating cardiomegaly and pleural effusion across patient-level 70/15/15 train-validation-test splits; achieved test AUROC scores of 0.897 and 0.859, respectively.
- Implemented validation-fitted temperature scaling and five class-specific decision-threshold policies, with F1-optimal thresholds achieving test F1-scores of 0.354 for cardiomegaly and 0.487 for pleural effusion; integrated bootstrap confidence intervals, confidence-based error analysis, and Grad-CAM explainability to systematically evaluate reliability.
- Conducted confidence-based error analysis and Grad-CAM explainability to investigate model predictions and support transparent evaluation of medical imaging results.

Telco Customer Churn Analysis | *SQL Server, Power BI, Python, Scikit-learn* *(GitHub)*

- Built an end-to-end analytics pipeline for 7,000+ telecom records, performing data cleaning, normalization, transformation, and validation in Python and SQL Server before loading analysis-ready datasets into Power BI.
- Developed interactive Power BI dashboards to track customer churn, tenure, contract type, internet service, and customer lifetime value, translating trends into actionable retention and segmentation recommendations.
- Used Excel functions and reporting tools to validate and reconcile analytical datasets, identify data-quality issues, and summarize key business metrics for reporting.

WORK EXPERIENCE.

SCRAMBLE LABS TECHNOLOGY PVT. LTD. Hybrid, Delhi, IN

Software Engineering Intern | |Technical Department May 2025 – April 2026

- Upgraded and enhanced a production backend platform for an enterprise CRM using AWS and serverless computing, improving reliability for 10+ business clients.
- Designed and implemented 15+ RESTful APIs and backend modules, optimizing database queries and collaborating with frontend engineers to ship scalable features.
- Diagnosed backend issues across API, business-logic, and database layers, collaborating in an Agile team through code reviews, testing, debugging, and production deployments.

HINDALCO INDUSTRIES LTD. (ADITYA BIRLA GROUP) Onsite, Renukoot, UP, IN

Project Intern | IT Department Jul 2024 – Aug 2024

- Generated backend modules for a Java-based Car Rental Management System spanning booking, customer management, rental tracking, billing, and reporting — 5 core modules supporting internal business operations.
- Developed and maintained backend functionality using Java and JDBC, optimizing database operations for 1,000+ records and improving data consistency through efficient SQL queries and join design.
- Performed debugging and unit testing protocols, documenting 3+ system workflows and technical specifications to support long-term maintainability, in coordination with the internal IT team

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY Ghaziabad, IN

Master of Computer Applications (MCA) | Specialization: Generative AI Expected May 2027 (Early Grad.)

IMS Ghaziabad (University Courses Campus) Ghaziabad, IN

BCA - Department of Computer Science Jul 2022 - Jul 2025

SKILLS

- **Languages**: Python, SQL
- **Data Analysis/Analytics & BI**: Power BI, Excel, Tableau, Pandas, NumPy, EDA, Statistical Analysis, Data Visualization
- **Data Privacy & Security**: Data Minimization, De-identification, Access Controls, Privacy-Aware Data Handling
- **Databases**: MySQL, PostgreSQL, Vector DB
- **Data Engineering**: ETL, Data Cleaning, Data Transformation, SQL Optimization, Data Modeling
- **Data Management**: Data Cleaning, Data Validation, Data Transformation, Data Modeling
- **Business Analytics**: KPI Dashboards, Trend Analysis, Reporting, Jupyter Notebook, Git, GitHub
- **Core Concepts**: Statistics, Probability, Computer Networks, Operating Systems, Database Design, DBMS

LEADERSHIP, VOLUNTEERING, & ACHIEVEMENTS

- **Co-founded ArnoLabs**; spearheaded the development of scalable software solutions for 15+ business clients, enhancing web platforms, APIs, and automation workflows.
