KISHAN KUMAR OJHA

Noida, IN | +91 8739047520| work.kishanojha@gmail.com |LinkedIn | Portfolio | Codolio | Github

Backend developer with hands on experience in Java and Spring Boot, having built and shipped REST APIs and backend modules for production systems at Scramble Labs Technology and Hindalco Industries. Skilled in Spring Security, Hibernate, Spring Data JPA, and cloud deployment using Elastic Beanstalk, S3, and Google Cloud Platform. Built full stack systems supporting 500+ concurrent users

WORK EXPERIENCE

SCRAMBLE LABS TECHNOLOGY PVT. LTD. Hybrid, Delhi, IN

Software Engineering Intern | |Technical Department May 2025 – Apr. 2026

- Enhanced a production backend platform for an enterprise CRM, improving reliability for 10+ business clients using Spring Boot, Hibernate, and MySQL.
- Designed and implemented 15+ RESTful APIs and backend modules, translating requirements from Product and QA teams into scalable backend features while collaborating with frontend engineers.
- Containerized and deployed backend services using Docker and Kubernetes on AWS Elastic Beanstalk, with Amazon S3 for application storage, across both AWS and Google Cloud Platform environments to support production deployments for enterprise clients.
- Diagnosed backend issues across API, business logic, and database layers, working in an Agile team through daily stand-ups, sprint planning, code reviews, and production deployments.

HINDALCO INDUSTRIES LTD. (ADITYA BIRLA GROUP) Onsite, Renukoot, UP, IN

Project Intern | IT Department Jul 2024 – Aug 2024

- Built backend modules for a Java based Car Rental Management System covering booking, customer management, rental tracking, billing, and reporting, spanning 5 core modules.
- Developed backend functionality using Java and JDBC, optimizing database operations for 1,000+ records and improving data consistency through SQL query and join design.
- Performed debugging and unit testing, documenting 3+ system workflows and technical specifications in coordination with the internal IT team.

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY Ghaziabad, IN

Master of Computer Applications (MCA) | Specialization: Generative AI Expected May 2027 (Early Grad.)

IMS Ghaziabad (University Courses Campus) Ghaziabad, IN

BCA - Department of Computer Science Jul 2022 - Jul 2025

PROJECTS

CampusFlow, a role based management platform |Springboot, React.js, Spring Security, JWT, Hibernate [LINK]

- Built a full stack Student Management System on a layered MVC architecture, separating controller, service, and repository layers, using Java, Spring Boot, React.js, and MySQL.
- Implemented JWT based role authentication across student, teacher, and admin roles, architected to scale to 500+ simultaneous users, with Spring Security handling access control.
- Optimized the data access layer using Spring Data JPA, indexing, and JOIN queries, improving API response time by 25% and reducing average query time by 30%.

CoreBank Engine, a layered banking operations system | Java 21, Collections Framework, Stream API [LINK]

- Designed a Banking operations system across 5 distinct architectural layers, separating validation, business logic, and data handling for 8+ core banking operations.
- Optimized algorithms and data structures across five distinct system layers, reducing code duplication by 30% and enhancing overall maintainability for 1,000+ records.
- Maintained data integrity and consistent processing across 1,000+ records through the layered design.

SKILLS

- **Core Programming Languages:** Java (8/11/17+), SQL, Python, JavaScript, TypeScript, C++
- **Backend Frameworks & APIs:** Spring Boot, Spring Framework, Spring MVC, Spring Data JPA, Spring Security, Hibernate/JPA, RESTful APIs, Microservices Architecture, JWT, GraphQL
- **Databases:** MySQL, PostgreSQL, MongoDB, JDBC, Database Optimization, Data Modeling, Relational Databases, NoSQL
- **Cloud & Deployment:** AWS (Elastic Beanstalk, S3), Google Cloud Platform (GCP), Cloud Deployment
- **Build Tools & Testing:** Maven, Gradle, JUnit 5, Mockito, Postman
- **Development Practices & Tools:** Git, CI/CD, Docker, Kubernetes, Agile Methodologies, System Design, OOP, Data Structures

LEADERSHIP, VOLUNTEERING, & ACHIEVEMENTS

*** Co-founded ArnoLabs**, a 10+ employee SaaS startup delivering scalable software solutions and custom client products across web platforms, APIs, and automation workflows for multiple business clients.
